

Suitable for all exterior conditions, porcelain pavers are ideal product for outdoor environments that require slip resistance and durability.

FREE online metro delivery over \$300!

Home / Beaton Steel Grey Paver

**surface finish - grip tiles**

Grip tiles have a rougher surface, making them less slippery. They have a thin, anti-luxure embedded in the glaze. Grip finish tiles are ideal for swimming pools, balconies and other areas that require non-slip surfaces. These tiles are not recommended for high traffic indoor areas such as bedrooms and kitchens.

**material - porcelain**

Porcelain tiles go in style with well-appointed furnishings of homes and offices because they offer unmatched variety of colours, shapes and sizes. A creative expression of your personality on your surfaces, these fully vitrified porcelain tiles are highly durable with a longer life span than other materials. They are a leading choice for homes and offices. They are ideal for outdoor use such as pools with high foot traffic and are the perfect solution for cold climates because of their frost-proof exterior. Their strength and non-porous nature make them highly resistant to staining. You can lay them by using an adhesive, grout and silicone sealant.

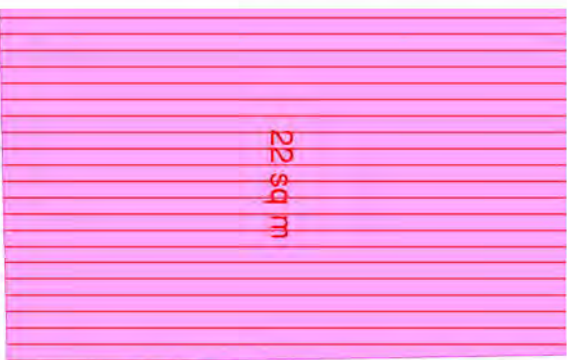

**edge - rectified**

Rectified tiles are mechanically trimmed during manufacturing, generally with a watered diamond blade allowing for smaller grout joints. The smaller grout joints give a seamless look to the floor and are easier to clean. Rectified tiles are the same size and have square edges. They are ideal when thin, clean and precise grout lines are required.

**product review**

**overview**

The Studio 39 series is inspired by Pietro Serena, also known as Macigno stone, a grey sandstone used extensively throughout Renaissance Florence architecture and loved for its natural elegance and versatility. Emulating the ever-colouring and fine grain of Pietro Serena, Studio 39 boasts a mix of cool and warm grey colourways and is fully coordinated with various sizes and finishes. Comprised of durable colour body porcelain, Studio 39 will create exceptional results from commercial spaces to high-end contemporary homes.

**surface finish - matt tiles**

Matt finish tiles are relatively less reflective and duller than gloss tiles. Their less amount surface makes them ideal for floor and wall application (ending a tranquil, soothing space in your home and office).  
Matt finish tiles are ideal for hallways, kitchens and entrance hallways. They can also be used in high traffic areas due to their durability and good slip resistance. The most important advantage of matt finish tiles is that they don't absorb spills and stains then look for a long time.

**material - porcelain**

Porcelain tiles go in sync with well-appointed furnishings of home and office because they offer unmatched variety of colours, shapes and sizes. A great choice for your personal life or commercial projects, porcelain tiles are highly durable with a longer life span. These tiles are also frostproof, rendering them the safest choice for homes and offices.  
They're not all. They are ideal for outdoor use and as photos with high foot traffic and are the perfect solution for cold climates because of their frost-proof feature. Their strength and non-porous nature make them highly resistant to stains. You can lay them by using an adhesive, grout and silicone sealant.

**edge - rectified**

Rectified tiles are mechanically trimmed during manufacturing, generally with a watered diamond blade allowing for smaller grout joints. The smaller grout joints give a clean, modern look and some space to clean. Rectified tiles have the same size and have square edges. They look very straight and square. These tiles are ideal when thin, clean and precise grout lines are required.

### overview

The Studio 39 series is inspired by Pietro Sereno, also known as Mo'cigno stone, a grey sandstone used extensively throughout Renaissance Florence architecture and loved for its natural elegance and

versatility. Emulating the ever-colouring and fine grain of Pietro Sereno, Studio 39 boasts a mix of cool and warm grey colourways and is fully coordinated with various sizes and finishes. Comprised of durable colour body porcelain, Studio 39 will create exceptional results from commercial spaces to high-end contemporary homes.

### surface finish - structured tiles

Structured tiles are given a special look during the forming process because their surface is changed from flat to a textured one. The texture of structured tiles ranges from protruding geometric shapes to angled facets. Some structured tiles have a three dimensional effect, which gives them a higher slip resistance. As a result only, they look great under lights, bringing depth and contrast. Reimagine your living space with structured tiles because they offer a different look and feel. Structured tiles are ideal for walls because they make them more sculptural appealing and dynamic.

### material - porcelain

Porcelain tiles go in sync with well-appointed furnishings of homes and offices because they offer unmatched variety of colours, shapes and sizes. A great choice for your personal life or commercial projects, wall and floor tiles are highly durable with a longer life span. These tiles are also freeze-proof, rendering them the safest choice for homes and offices. That's not all. They are ideal for outdoor use and as photos with high foot traffic and are the perfect solution for cold climates because of their frost-proof nature. Their strength and non-porous nature make them highly resistant to staining. You can lay them by using an adhesive, grout and silicone sealant.

### edge - rectified

Rectified tiles are mechanically trimmed during manufacturing, generally with a smaller diamond blade allowing for smaller grout joints. The smaller grout joints give a clean, refined look to the same space and have square edges. They look very straight and square. These tiles are ideal when thin, clean and precise grout lines are required.

## overview

floating floor suitable for installation throughout the entire home. Built for harsh Australian conditions, National Tiles Hybrid Flooring features an OptiMicro - 22 sq m tile layer that remains stable in extreme climates. National Tiles Hybrid Flooring is soft, quiet and warm underfoot. Easy to install with 50 Click Technology, National Tiles Hybrid Flooring is ideal for Diverse of all levels as well as trade professionals.

**Product Range - Mistura:** Mistura Hybrid offers the natural beauty of real timber floors with an increased durability, versatility and water resistance. Embossed textures beautifully replicate timber grains and a micro bevelled profile creates an authentic timber flooring look and the commercial wear layer will shield against day-to-day wear and tear. With a pre-attached acoustic backing Mistura also meets the acoustic requirements for apartment living applications. Boasting 12 matt-finished colourways spanning a range of European Oak, Mistura Hybrid will create warm and sophisticated interiors.

**surface finish - embossed in register**

Caring beyond simple aesthetics, an embossed in register surface recreates the look and feel of real timber planks. Registered on bearing embossed the exact texture of real timber grain, which means that you not only see timber grain and knots, you can also feel the register texture.

**material - hybrid**

Similar to Laminatic flooring, Hybrid is a multi-layered flooring product. In contrast to Laminatic, Hybrid is water proof and softer underfoot. Hybrid flooring consists of a pre-attached acoustic backing layer with an OptiCore substrate layer. A decorative layer with a high quality digital image is followed by a transparent PU protective coating. The protective coating adds extra durability and will withstand mechanical and tear abrasion with the same ease as a solid surface. The hybrid and pre-attached acoustic backing will likely scratch hybrid surfaces, as will delaminate.

**edge - bevelled**

Bevelled tiles undergo a process called beveling, which is used to take off as little as 0.5 mm of a tile's edge to create a micro level. Bevelled tiles are ideal for areas such as bedrooms, kitchens and laundry, imparting a comforting look to the surroundings.
